Through the chemists, he controlled the work on dyestuffs for color film and watched over the written reports. In addition, he was interested in the work previously done at Wolfen on triphenylmethane dyes. This latter was his special field of interest for NIOPIK in Moscow and for which he collected journals, samples, etc. He also worked with MISUCH and others on the organization and general control of the scientific work. He undoubtedly took an important part in the preparation of the list of those chemists who were to be sent to the USSR. He probably took an important part in the preparation of the list of chemists who were to be sent to the USSR, since he was present at Wolfen from the beginning of the Soviet occupation to, no doubt, the end of 1946. MISUCH appeared in Rubeshnaya wearing civilian clothing in June 1947. 50X1-HUM
